FAQ – Batteries

1) Where can I provide the information about batteries?

NTG-P-107 quantity of batteries included
NTG-P-108 quantity of batteries required

NTG-P-354 quantity of batteries included 1
NTG-P-355 quantity of batteries required 1
NTG-P-109 battery description 1
NTG-P-110 battery format/code 1 (code list batteries)
NTG-P-111 battery weight 1
NTG-P-112 battery rechargeable 1

NTG-P-356 quantity of batteries included 2
NTG-P-357 quantity of batteries required 2
NTG-P-182 battery description 2
NTG-P-183 battery format/code 2 (code list batteries)
NTG-P-184 battery weight 2
NTG-P-185 battery rechargeable 2

NTG-P-358 quantity of batteries included 3
NTG-P-359 quantity of batteries required 3
NTG-P-247 battery description 3
NTG-P-248 battery format/code 3 (code list batteries)
NTG-P-249 battery weight 3
NTG-P-250 battery rechargeable 3

NTG-P-309 battery exchangeable

The information about
NTG-P-107 quantity of batteries included
NTG-P-108 quantity of batteries required

refer to the sum of all batteries.

As seen above, battery data can be entered for up to three different battery types.
The information must be separated for different batteries.

The NTG-P-309 Battery Replaceable field is used to indicate whether the batteries in this product are replaceable.

2) Where can I provide how many batteries exist (1, 2 and 3)?

These information can be filled in:
NTG-P-354 quantity of batteries included 1
NTG-P-356 quantity of batteries included 2
NTG-P-358 quantity of batteries included 3

Only the quantity is to be used here. All other information can be found in the corresponding marked fields.

3) How to fill in „battery description" (NTG-P-109 ; NTG-P-182; NTG-P-247)?

Simple example:
[Quantity] [General identification (from code list batteries)]
3 AAA

Comprehensive example:
[Quantity] [General identification (from code list batteries)] [Volt (from code list batteries)] [Chemicals (from code list batteries)]
3 AAA 1.5 V Alcaline Manganese

4) How to fill in „battery format/code" (NTG-P-110; NTG-P-183; NTG-P-248)?

Please use the code list batteries. These can be found at:
http://networktoys.de/Downloads/ → Product data code lists

Example:
[ANSI Number (from code list batteries)]
13AC

5) The available information about the battery format is with IEC encoding. Where can I find the corresponding ANSI number?

This information is provided in the code list batteries. These can be found at:
http://networktoys.de/Downloads/ → Product data code lists

Example:
IEC encoding: LR20
ANSI number: 13AC
